

# PREPPED AND READY

## TRUE PEEL™ PE PREP TOOLS

True Peel™ PE Prep Tools remove dirt and oxidation from the outside diameter of pipe in preparation for electrofusion. The spring-loaded blades don't skip, keeping consistent pressure on the pipe to yield a smooth, finished surface. These tools can be used on the ends of pipe or on tapping tee outlets. Each model is specific for both pipe size and wall thickness. Reed True Peel™ models include a protective carrying case.

- Removes .009" – .012" peel thickness for a clean electrofusion surface.
- Observation window allows operator to see when peel is complete.
- Close-fitting mandrel rounds pipe that may be oval.
- Rotate blade 180 degrees for a second cutting edge and twice the blade life.

Protective carrying case included.

Catalog No.	Item Code	Description	
PEP1IPS7	04624	Fits 1" IPS DR7	.188 Wall
PEP50CTS7	04634	Fits ½" CTS SDR7	.090 Wall
PEP75IPS11	04635	Fits ¾" IPS DR11	.095 Wall
PEP1CTS115	04636	Fits 1" CTS SDR11.5	.099 Wall
PEP1IPS11	04637	Fits 1" IPS DR11	.120 Wall
PEP125IPS11	04638	Fits 1-1/4" IPS DR11	.151 Wall
PEP2IPS11	04639	Fits 2" IPS DR11	.216 Wall
