PLAS
Hand-over-Hand
In-Line Rotary™ Cutters

- Excellent for cutting PVC or PE pipe in-trench or above ground. Only 11” (280 mm) clearance required.
- Attached handles permit fast hand-turning – about half the cutting time of a regular PLAS cutter.
- Rollers keep cutter aligned, ensuring a square cut.
- Leaves a disposable remnant (not dust or chips) that is easy to recycle.
- Long-lasting, carbide-tipped blades for PVC penetrate up to a 2” wall thickness with PLASOH model.
- PVC bevel blade produces, in-line, a 15° bevel on both sides of the cut.
- Get exceptional cuts on PE with the PLASOHPE hardened, tool steel blade.
- Versatile – switch one model to the other with simple blade changes.
